Material Specification

► Material

All major steel parts shall be of mild cold rolled commercial quality steel.

► Material

Shall be 14 gauge, channel shaped on both the lock and hinge side, with angle formations across the top and bottom. Locker doors shall have a 16 gauge full height reinforcement channel.

► Hinges

Shall be barrel (hidden) hinges riveted to both door and frame.

► Number Plates

Each locker shall have a polished aluminum number plate riveted to door frame with black numerals 3/8" high.

► Finish

All material shall be power washed and phosphate treated for maximum finish color adhesion. All components shall be finished with a hybrid epoxy/polyester powder, electrostatically applied to ensure uniform thickness and baked to cure.

► Handles

Shall be one-piece 20 gauge deep drawn stainless steel cup designed to accommodate locks.

► Color

Locker color shall be selected from the RAL COLOR CHART.

► Construction

All lockers shall be built on a unit principle with common intermediate uprights separating units.

► Body

Bottoms shall be 16 gauge. Tops, sides, backs, and shelves shall be 24 gauge.

► Latching

Lockers shall have an anti-pry feature secured to the frame. The frame hook shall have a padlock hasp protruding through the recessed handle.

► Assembly

Factory-assembled lockers shall be welded.

► Door Frames

Shall be 16 gauge formed in a channel shape. Vertical members shall have additional flange to provide a continuous door strike. Cross frame members shall also be 16 gauge channel shaped.

► Interior Equipment

Lockers shall be equipped with a shelf. If under 18" deep, locker shall have three wall hooks and ceiling hook. Lockers 18" deep or more shall have a coat rod instead of a ceiling hook. Lockers 15" wide and wider shall have four wall hooks and one ceiling hook.
